

Jewelry Care

Thank you for your purchase! I hope your Ethereal Sun piece makes you feel like the beautiful light that you are!

A few things to keep in mind when adorning yourself with these pieces:

Raw Brass: When wearing brass, keep away from moisture. This will cause spots and tarnish. If tarnish occurs there are a few ways to clean it. This ones my favorite:

What you need:

- ½ Cup Vinegar
- 1 tsp. Salt
- ½ Cup flour

How to:

- Mix together and make a paste.
- Apply to tarnished areas on the raw brass.
- Let sit for 10-15 minutes. Wipe or rinse clean with warm water (be careful with certain stones)
- Dry with a clean cloth.

Stone and Crystal: Some Crystals (such as Angelite, Moonstone, Opal, Lapis, Ruby, Aquamarine, and some tourmaline) should not be submerged in water. If you aren't sure about the crystal you're wearing, do a quick google search before cleaning or if you might be getting wet!

Your ethereal sun piece is delicate and needs to be treated with love and gentleness. It's recommended that you don't wear your Ethereal Sun pieces for any water related activities (shower, pool, beach, spa etc.), sleeping, or performing any excessive physical activities in it (Working out, hiking, gardening etc.).

Most Ethereal Sun Pieces include raw brass, gold plated, or copper materials. If you have questions about your piece, please reach out to EtherealSunDesigns@gmail.com

Thank you for supporting an independent and woman owned business!

Love and Light,
Lily
Owner and Creator of Ethereal Sun
